lovers from all over the world to Spain. It was here, in the capital of Catalonia, that the famous master of architecture produced nearly all of his works, including villas for the well-to-do bourgeoisie, the expansive Güell Park (which today is open to the public), and the famous church designed in honour of the Holy Family--a project which was begun over 100 years ago and has yet to be completed. Antoni Gaudí's life was full of contradictions. As a young man he joined the Catalanian nationalist movement and was critical of the church; toward the end of his life he devoted himself completely to the construction of one single church. As a young man Gaudí had a liking for the glamour of social life and the looks of a dandy; in old age, on the other hand, he lived a spartan life. Gaudí never married and devoted his life entirely to his art: architecture. His works have been acclaimed as "soothing oases in a desert of functional buildings," as "precious gems in the uniform grey of rows of houses," and the master himself was acclaimed as the "Dante of architecture". This book provides a sweeping study of his entire career, presenting his complete works via texts and illustrations.

and beloved architects. His masterpiece, the still-uncompleted Sagrada Família basilica of Barcelona, is one of the most visited monuments in Spain. But this Catalanian architect is especially inspiring to children, who marvel at the nontraditional forms he employed in his buildings and designs. Using pages of colorful stickers to inspire learning and creativity, this entertaining book will encourage young readers to build their own Gaudí-like creations while teaching them much about the architect's life and accomplishments.

Part of Electa's "Modern Masters" series, this monograph is a thorough look at the life, work, and cultural influences of one of the 20th century's most enigmatic yet popular architects: Antoni Gaudí (1852–1928). (The spelling of the architect's name in this volume is in Catalan.)

Children can enter the surreal world of the master architect, Antoni Gaudí, and color in his weird and wonderful creations inspired by nature and the intricate beauty of the world around us. The Catalanian architect is especially appealing to children, who will marvel at the organic forms inspired by nature he employed in his buildings and designs. This engaging activity book will inspire learning and creativity in children, and will encourage young readers to build

their own Gaudí-like creations.

At the time of his death in 1926, Antoni Gaudí was arguably the most famous architect in the world. He had created some of the greatest and most controversial masterpieces of modern architecture, which were as exotic as they were outrageous. But little is known about the shadowy figure behind the swirling, vivid buildings that inspired the Surrealists. This masterful biography brings both man and architect powerfully to life against the changing backdrop of Barcelona and Catalonia. Gijs van Hensbergen leads us through the design and construction of Gaudí's most significant buildings -- revealing their innovation and complexity, and demonstrating the growing relevance of Gaudí's architecture today.

Gaudi's bizarre and romantic buildings, interiors and exteriors, mosaics and public spaces, have imbued Barcelona with unique character and ensured his place in the pantheon of great architects.

*Includes pictures *Includes a bibliography for further reading "Those who look for the laws of Nature as a support for their new works collaborate with the creator." - Antoni Gaudi Halfway into the 19th century, Spain's Catalonia underwent a sweeping transformation when it was thrust into not one, but 2 golden eras - the Renaixena and the Industrial Revolution. It was during this explosive period of creativity, thriving prosperity, and invigorated patriotism that a steadfastly nonconforming and fascinatingly eccentric icon was born, one that was about to take Catalonia by storm with his brilliant eye for unorthodox art and his legendary - or as some would say, notoriously - out-of-the-box ideas. Salvador Dal, the celebrated surrealist, was one of many who would find a fount of inspiration in him, even once raving about the Sagrada Familia, the highlight of this icon's career: "Those who have not heard about the chromatic and shining essence of its color, the astonishing polyphony of its towers as organ pipes and shocked by its mutant naturalism, are traitors." This icon in question, of course, is none other than what many now consider to be the patriarch of the Catalan Modernism movement: Antoni Gaud. Across the pond, America's most innovative and prolific architect was Frank Lloyd Wright, whose works are almost too vast and diverse to list. Recognized for designing unique churches and distinctive commercial buildings, and admired for his geometric style

house designs, Wright has been widely imitated, and his work continues to influence architecture not only in the United States but around the world. Laymen often think they know the definition of "a Frank Lloyd Wright," but they probably don't fully understand the brilliant mind of the man, nor the intricacies of his Prairie Style. Yet it endures because he has made it so. In many ways, Wright's architectural career has overshadowed other aspects of his life. In the course of creating innovative kinds of offices, churches, schools, skyscrapers, hotels, and museums, not to mention furniture and stained-glass decorations, Wright wrote over a dozen books and toured America and Europe at large, often giving widely acclaimed speeches. Despite a somewhat hardscrabble start to life in the Midwest, Wright became known for his flamboyant and entertaining lifestyle, which included multiple marriages and scandals like the murders at his Taliesin studio in 1914. But through it all, Wright continued working nearly up until his death, and in 1991 the American Institute of Architects recognized him as "the greatest American architect of all time" Antoni Gaudi and Frank Lloyd Wright: The Lives and Works of the Most Influential Modern Architects examines the lives of both men, their most memorable works, and the lasting legacies each left. Along with pictures depicting important people, places, and events, you will learn about Antoni Gaudi and Frank Lloyd Wright like never before.

Spanish architect and designer, Antoni Gaudí (1852–1926) was an important and influential figure in the history of contemporary Spanish art. His use of colour, application of a range of materials and the introduction of organic forms into his constructions were an innovation in the realm of architecture. In his journal, Gaudí freely expressed his own feelings on art, “the colours used in architecture have to be intense, logical and fertile.” His completed works (the Casa Batlló, 1905–1907 and the Casa Milà, 1905–1910) and his incomplete works (the restoration of the Poblet Monastery and the altarpiece of Alella in Barcelona) illustrate the importance of this philosophy. His furniture designs were conceived with the same philosophy, as shown, for example, in his own office (1878) or the lamps in the Plaza Real in Barcelona. The Sagrada Família (1882–1926) was a monumental project which eventually took over his life (it was still incomplete at the time of his death).
