Astronaut Academy: Zero Gravity. Written and Illustrated by Dave Roman. Hakata Soy's past as the leader of a futuristic superhero team is catching up with him, just as he's making a fresh start at a new school. How can Hakata study for his classes in anti-gravity gymnastics, fireball throwing, and wearing cute hats when he's got a robot doppelganger on its way to kill him?

~~Astronaut Academy » Books~~

You can do this on a "zero-gravity flight" or "parabolic flight". Astronauts are weightless in space. To prepare themselves on Earth for that weightlessness, they regularly undertake parabolic flights. The Space Training Academy organizes parabolic flights, including preparation.

Now in full-color *Astronaut Academy: Zero Gravity*, the first volume of the middle-grade graphic novel series from Dave Roman Hakata Soy's past won't stay in the past! This former space hero is doing his best to keep his head down at Astronaut Academy. Things aren't going so great, though. The most popular girl in school has it in for him. His best friend won't return his calls. And his new roommate is a complete jock who only cares about Fireball. Hakata just wants to make a fresh start. But how will he find time to study Anti-Gravity Gymnastics and Tactical Randomness when he's got a robot doppelganger on its way to kill him?

Hakata Soy looks to make a new start at Astronaut Academy, but his past as the leader of a futuristic superhero team catches up to him when a robot doppelganger is sent to kill him.

Astronaut Academy: Splashdown is the exciting third installment of the middle grade graphic novel series from author Dave Roman. Heroes like Hakata Soy don't take vacation! It's summer vacation for the students of Astronaut Academy, and Maribelle Mellonbelly is throwing the best party ever on Beach Planet? Yes! But tensions heat up fast when Hakata Soy's arch rival, Rick Raven, arrives. And soon the whole planet is heating up with a giant volcano threatening to blow its top! Unless they can work together save the planet, the students of Astronaut Academy will be toast. But can they put aside their differences in time to turn the tides?

Babymouse, an imaginative young mouse is terrified to face her enemy in dodgeball, but with the help of her best friend Wilson and support from her mother, she not only plays the game, she proves herself a hero. *Simultaneous*.

What's the best part of being an astronaut? Is it the excitement of leaving the Earth behind at the mind-boggling speed of 25,000 mph? Is it the chance to float around a shuttle in zero gravity? Or make new scientific discoveries? Or go out on a space walk? Few of us get to answer these questions for ourselves by rocketing into space. But a group of kids took the first step by going to U.S. Space Academy. For close to a week, they tried on flight suits and the lives of training astronauts. They used NASA simulators and learned how to walk on the Moon and how to work without gravity. They walked, talked, read, lived space travel. Then, they blasted off on a mission of their own.... Susan E. Goodman and Michael J. Doolittle bring the adventures of science and space travel alive in the fifth book of the *Ultimate Field Trip* series. Vivid storytelling and photos help readers don mental space suits and go along for the ride.

The president's retreat, Camp David, is one of the safest places in the United States. So why can't the President's son, Luke, and his friends Theo and Callie stay there without Secret Service agents constantly hovering over them, watching their every move? And yet, when an earthquake sets off a raging wildfire, causing a chain reaction that wreaks havoc at Camp David, they are suddenly on their own. Now Luke needs a plan: To override the security systems To save those who were supposed to save him To get through an impassable gate To escape Camp David Debut author Dee Garretson delivers a heart-pounding tween thriller—an action-packed adventure with undeniable suspense.

Blast off and experience space travel with this collection of fascinating, funny, and sometimes weird anecdotes from real astronauts. Everyone wonders what it's really like in space, but very few of us have ever had the chance to experience it firsthand. This captivating illustrated collection brings together stories from dozens of international astronauts—men and women who've actually been there—who have returned with accounts of the sometimes weird, often funny, and awe-inspiring sensations and realities of being in space. With playful artwork accompanying each, here are the real stories behind backwards dreams, "moon face," the tricks of sleeping in zero gravity and aiming your sneeze during a spacewalk, the importance of packing hot sauce, and dozens of other cosmic quirks and amazements that come with travel in and beyond low Earth orbit. Praise for *What's It Like in Space?* "Houston, we have a winner." "Oprah Magazine "[A] captivating illustrated collection." "Smithsonian Magazine "A delightful mini-coffee table book about all the awkward and beautiful moments you can have in space, based on dozens of interviews with people who have actually been there. If you're looking for a fun read about life outside the gravity well, check out *What's It Like in Space?*" "Ars Technica "This charmingly illustrated book is much meatier than its diminutive size would suggest. These snippets are so clear, so beautifully curated, that they really do leave you with a sense of what it must be like to float miles above Earth." "Entertainment Weekly

A #1 New York Times bestseller "This little mouse may well inspire some big dreams." "Kirkus Reviews "In this picture book based on the space shuttle Endeavor—Meteor is one of the smallest mice, but the most hardworking—the values of being small, useful, solving problems, and working hard—as opposed to being big and strong—will inspire young readers." "School Library Journal "Inspired by this real-life mouse, Kelly's first children's book tells the story of Meteor, a lightly anthropomorphized rodent who turns his tininess into an advantage when an important key gets stuck in a crack between two monitors—textured images and vivid portraits that make it absolutely clear that space travel is a larger-than-life adventure." "Publishers Weekly A heartwarming picture book tale of the power of the small, from bestselling author and retired NASA astronaut Commander Mark Kelly. Astronaut Mark Kelly flew with "mice-tronauts" on his first spaceflight aboard space shuttle Endeavour in 2001. *Mousetronaut* tells the story of a small mouse that wants nothing more than to travel to outer space. The little mouse works as hard as the bigger mice to show readiness for the mission . . . and is chosen for the flight! While in space, the astronauts are busy with their mission when disaster strikes—and only the smallest member of the crew can save the day. With lively illustrations by award-winning artist C. F. Payne, *Mousetronaut* is a charming tale of perseverance, courage, and the importance of the small!
