The FDA's goals to protect and ensure the safety of consumers who use dietary supplements must also take into account the original goal of DSHEA, providing a common-sense approach to regulation of dietary supplements as opposed to lumping them in with the more stringent regulations applicable to drug products.

What FDA Dietary Supplement Regulations Mean For Herbalists

In addition to vitamins, dietary supplements can contain minerals, herbs or other botanicals, amino acids, enzymes, and many other ingredients. Dietary supplements come in a variety of forms, including tablets, capsules, gummies, and powders, as well as drinks and energy bars. Popular supplements include vitamins D and B12; minerals like calcium and iron; herbs such as echinacea and garlic; and products like glucosamine, probiotics, and fish oils.

Dietary Supplements: What You Need to Know

And, brand owners must submit a notification to the FDA quoting the claim "no later than 30 days after marketing the dietary supplement with the claim." Finally, the use of structure/function claims on a product label requires specific disclaimers on the same label.
