Oil temp is running way too hot. 250 plus when loaded. Truck is not being used until this is resolved. The rad was replaced a month ago and coolant temp rarely goes above 195. Stays about 180 most of the time. The oil temp sensor, oil cooler and oil thermostat have all been replaced since the problem started. I'm completely baffled. Please help.

TURBONYCOIL 3516 is used by major MROs as engine preservation oil at the end of maintenance tasks or during aircraft storage. It

Online Library High Engine Oil Temp 3516

retains low viscosity at very low temperature (down to -60°C), and is therefore an efficient oil for the cold parts of A/C engines and airframes. It can also be used as a multi-purpose lubricant for many aircraft parts.
