As the air has warmed and the wind has died, the midges have descended. Its a sure sign of summer arriving in the Hebrides, even when the sky does not always mirror it. Small tiny flies with one hell of a bite leaving one hell of an itch. Wrapping its way around the island the great expanse of water in front of the house has been a hive of differing activity.

In 1773 Samuel Johnson and James Boswell made their celebrated journey through the Highlands of Scotland and the Hebrides. Johnson published his great account, the "Journey to the Western Isles of Scotland" in 1775, and it became one of the most acute - and popular - social commentaries of its age. The 33 year old Boswell composed his more anecdotal and high-spirited journal, "A Tour to the Hebrides", in 1786; it is chiefly a revelatory portrait of Johnson as he ventured into the unfamiliar ...

When James Boswell persuaded Samuel Johnson to embark on a tour of Boswell's native Scotland in 1773, the adventure resulted in two magnificent books, Johnson's *Journey to the Western Islands of Scotland* and Boswell's *Journal of a Tour to the Hebrides*. Johnson offers a magisterial account of what was then a remote and rugged land, while Boswell throws further light on the friend and mentor whom he immortalized in his biography.

Johnson's *Journey to the Western Islands* and Boswell's *Journal of a Tour to the Hebrides* form a natural pair for an OWC because both books, often read and taught alongside each other, focus on the Scottish highlands.

Few landscapes are as striking as that of the Hebrides, the hundreds of small islands that speckle the waters off Scotland's northwest coast. The jagged, rocky cliffs and rolling waves serve as a reminder of the islands' dramatic geological history, inspiring awe and dread in those drawn there. With Britain at their back and facing the Atlantic, the Hebrides were at the center of ancient shipping routes and have a remarkable cultural history as well, as a meeting place for countless cultures that interacted with a long, rich Gaelic tradition. After years of hearing about Scotland as a place deeply interwoven with the story of her family, Madeleine Bunting was driven to see for herself this place so symbolic and full of history. Most people travel in search of the unfamiliar, to leave behind the comfort of what's known to explore some suitably far-flung corner of the globe. From the first pages, it's clear that Madeleine Bunting's *Love of Country* marks a different kind of journey—one where all paths lead to a closer understanding of home, but a home bigger than Bunting's corner of Britain, the drizzly, busy streets of London with their scream of sirens and high-rise developments crowding the sky. Over six years, Bunting returned again and again to the Hebrides, fascinated by the question of what it means to belong there, a question that on these islands has been fraught with tenacious resistance and sometimes tragedy. With great sensitivity, she takes readers through the Hebrides' history of dispossession and displacement, a history that can be understand only in the context of Britain's imperial past, and she shows how the Hebrides have been repeatedly used to define and imagine Britain. In recent years, the relationship between Britain and Scotland has been subject to its most testing scrutiny, and Bunting's travels became a way to reflect on what might be lost and what new possibilities might lie ahead. For all who have wondered how it might feel to stand face-out at the edge of home, *Love of Country* is a revelatory journey through one of the world's most remote, beautiful landscapes that encourages us to think of the many identities we wear as we walk our paths, and how it is possible to belong to many places while at the same time not wholly belonging to any.

Samuel Johnson and James Boswell spent the autumn of 1773 touring the Highlands and Western Islands of Scotland. Both kept detailed notes of their impressions, and later published separate accounts of their journey. These accounts of their great tour contain some of the finest pieces of travel writing ever produced: they are magnificent historical documents and also portraits of two extraordinary personalities. In the vivid prose of these two famous men of letters, the Highlands and the Western Islands spring to life. The juxtaposition of the two very different accounts creates an unsurpassed portrait of a society which was utterly alien to the Europe of the Enlightenment, and which was straining on the brink of calamitous change. These great masterpieces, entertaining, profound, and marvellously readable are also our last chronicles of a lost age and people.
