PW50 (1981-1983; 1985-1987; 1990-2002), PW80 (1983; 1985; 1991-2002), BW80 (1986-1988; 1990)

This two-volume set (CCIS 158 and CCIS 159) constitutes the refereed proceedings of the International Workshop on Computer Science for Environmental Engineering and EcoInformatics, CSEEE 2011, held in Kunming, China, in July 2011. The 150 revised full papers presented in both volumes were carefully reviewed and selected from a large number of submissions. The papers are organized in topical sections on computational intelligence; computer simulation; computing practices and applications; ecoinformatics; image processing information retrieval; pattern recognition; wireless communication and mobile computing; artificial intelligence and pattern classification; computer networks and Web; computer software, data handling and applications; data communications; data mining; data processing and simulation; information systems; knowledge data engineering; multimedia applications.

With fuel costs and parking charges it's no wonder the consumer is looking for less expensive forms of travel. This book is aimed at the rider who wants to do his or her own basic scooter maintenance and servicing without the need for in-depth mechanical knowledge, or a technical manual. It covers areas such as oil, brakes, tyres, transmission, electrics, etc, allowing the owner to address the most regularly serviced items without forking out for additional costs. Illustrated with full colour photographs throughout, and featuring clear, easy-to-follow instructions, this book is a must-have for scooter users.

* Covers the A-to-Z of Axapta in 300 pages * Author is the world's leading Axapta expert * Provides essential guidance to a fast-growing community currently deprived of suitable documentation and training

Ashida Kim reveals the meditations, breathing exercises and kuji-kiri hand forms that enable readers to cultivate and direct the chi, as well as tune into the minds of others.

An American couple arrives at the luxury Lake Palace Hotel in India for a second honeymoon. Their five-day stay will change their lives forever. RAJASTHAN SUITE MEMORY, set in present time and in 1600s Rajasthan, is a combination of adventure, romance, a fight against tyranny - and a look at life for women in a royal palace in the 1600s. The characters glide smoothly from their contemporary life to their earlier life - intertwining what happened then with what they have to undergo today. Convincing story-telling that keeps you on the edge of your seat! Part history, part fiction, RAJASTHAN SUITE MEMORY is vivid, memorable and informative.

Imprisoned for life aboard a zeppelin that floats high above a fantastic metropolis, greeting-card writer Harold Winslow pens his memoirs. His only companions are the disembodied voice of Miranda Taligent, the only woman he has ever loved, and the cryogenically frozen body of her father, Prospero, the genius and industrial magnate who drove her insane. As Harold heads toward a last desperate confrontation with Prospero to save Miranda's life, he finds himself an unwitting participant in the creation of the greatest invention of them all: the perpetual motion machine. Beautifully written, stunningly imagined, and wickedly funny, Dexter Palmer's The Dream of Perpetual Motion is a heartfelt meditation on the place of love in a world dominated by technology.

YFM660F Grizzly 660 (2002-2008)

Many key aspects of life are based on naturally occurring polymers, such as polysaccharides, proteins and DNA. Unsurprisingly, their molecular functionalities, macromolecular structures and material properties are providing inspiration for designing new polymeric materials with specific functions, for example, responsive, adaptive and self-healing materials. Bio-inspired Polymers covers all aspects of the subject, ranging from the synthesis of novel polymers, to structure-property relationships, materials with advanced properties and applications of bio-inspired polymers in such diverse fields as drug delivery, tissue engineering, optical materials and lightweight structural materials. Written and edited by leading experts on the topic, the book provides a comprehensive review and essential graduate level text on bio-inspired polymers for biochemists, materials scientists and chemists working in both industry and academia.
