Building on its unrivalled reputation as the definitive EU law textbook, this seventh edition continues to provide clear and insightful analysis of all aspects of European Union law. Drawing on their wealth of experience, Paul Craig and Gráinne de Búrca succeed in bringing together a unique mix of illuminating commentary and well-chosen extracts from a wide range of cases, legislation, and academic publications. Chapters have been carefully structured and designed to enhance student learning at all levels, laying the foundations of the subject while building analysis of more complex areas and cutting-edge debates. The seventh edition has been comprehensively updated to reflect the extensive legal developments that have taken place since publication of the sixth edition, and a new chapter on current challenges facing the EU has been added.

"'Gender Matters' is a manual aimed to assist educators and youth leaders work on issues of gender and gender-based violence with young people. This publication presents theoretical information, methods and resources for education and training activities, along with concrete exercises that users can put into practice in their daily work. Violence is a serious issue which directly affects the lives of many young people. It often results in lasting damage to their well-being and integrity, putting even their lives at risk. Gender-based violence, including violence against women, remains a key human rights challenge in contemporary Europe and in the world. Working with young people on human rights education is one way of preventing gender-based violence from occurring. By raising awareness on why and how it manifests and exploring its impact on people and in society, gender-based violence will no longer go undetected. Gender really does matter, to women, to men, to young people - to all of us. This manual serves to explore these human rights issues and act upon them."--Book jacket.

Transitional Justice Theories is the first volume to approach the politically sensitive subject of post-conflict or post-authoritarian justice from a theoretical

perspective. It combines contributions from distinguished scholars and practitioners as well as from emerging academics from different disciplines and provides an overview of conceptual approaches to the field. The volume seeks to refine our understanding of transitional justice by exploring often unarticulated assumptions that guide discourse and practice. To this end, it offers a wide selection of approaches from various theoretical traditions ranging from normative theory to critical theory. In their individual chapters, the authors explore the concept of transitional justice itself and its foundations, such as reconciliation, memory, and truth, as well as intersections, such as reparations, peace building, and norm compliance. This book will be of particular interest for scholars and students of law, peace and conflict studies, and human rights studies. Even though highly theoretical, the chapters provide an easy read for a wide audience including readers not familiar with theoretical investigations.

Countries emerging from armed conflict or authoritarian rule face difficult questions about what to do with public employees who perpetrated past human rights abuses and the institutional structures that allowed such abuses to happen. *Justice as Prevention: Vetting Public Employees in Transitional Societies* examines the transitional reform known as "vetting"—the process by which

abusive or corrupt employees are excluded from public office. More than a means of punishing individuals, vetting represents an important transitional justice measure aimed at reforming institutions and preventing the recurrence of abuses. The book is the culmination of a multiyear project headed by the International Center for Transitional Justice that included human rights lawyers, experts on police and judicial reform, and scholars of transitional justice and reconciliation. It features case studies of Argentina, Bosnia and Herzegovina, the Czech Republic, El Salvador, the former German Democratic Republic, Greece, Hungary, Poland, and South Africa, as well as chapters on due process, information management, and intersections between other institutional reforms.

Considering victimology as a reflection of the structure of American society, Elias examines its links to the broad arenas of social, political and economic relations and advocates a new victimology of human rights that embraces victims of both crime and oppression.

This book considers local autonomy, measured as a multidimensional concept, from a cross-country comparative perspective, and examines how variations can be explained and what their consequences are. It fills a gap in the literature by providing a comprehensive study

of the different components of local autonomy across a large number of countries, over time. It offers a theoretically saturated concept to measure local autonomy and applies it to 39 countries, including all 28 EU member states together with Albania, Georgia, Iceland, Liechtenstein, Macedonia, Moldova, Norway, Serbia, Switzerland Turkey and Ukraine, over a period of 25 years (1990-2014).
