current mechanisms are and the ongoing problems that remain to be managed in order to safeguard the 'common heritage'.

This book provides a comprehensive overview of the development of international cultural heritage law and policy since 1945. It sets out the international (including regional) law currently governing the protection and safeguarding of cultural heritage in peace time, as well as international cultural policy-making. In addition to analysing the relevant legal frameworks, it focuses on the broader policy and other contexts within which and in response to which this law has developed. Following this approach, attention is paid to: introducing international cultural heritage law and its place in international law generally; illicit excavation and the illegal trade in archaeological finds; protection of underwater cultural heritage; the relationship between cultural heritage and the environment; intangible aspects of heritage and their safeguarding; cultural heritage as traditional knowledge and creativity; regional approaches to protection; and human rights issues related to cultural heritage. In addition, newly-emerging topics and challenges are addressed, including the relationship between cultural heritage and sustainable development and the gender dynamics of cultural heritage. Providing both a perfect introduction to cultural heritage law and deeper reflection on its challenges, this book should be invaluable for students, scholars, and practitioners in the field.

This volume contains relevant and pressing issues in the law, policy, and the practice of art and cultural heritage protection.

This illuminating book offers an authoritative analysis of the legal issues relating to safeguarding intangible cultural heritage. Taking a critical approach, it provides a unique

insight into the impact of international and national law on the present and future safeguarding processes of intangible cultural heritage. Expert contributors draw on the results of an international study conducted in 26 countries to illustrate how domestic laws comprehend the notion of intangible cultural heritage. The book explores the relationship that these states maintain with the safeguarding of intangible cultural heritage and highlight challenging concepts.

Cultural heritage property can be protected in a variety of ways, including at the international level, by enforcement in domestic courts, and through alternative dispute resolution mechanisms. This book sets out the legal framework applicable to cultural heritage and assesses how this works in practice, including in situations of conflict.

The world's cultural heritage is under threat from war, illicit trafficking, social and economic upheaval, unregulated excavation and neglect. Over a period of almost fifty years, the United Nations Educational, Scientific and Cultural Organisation has adopted five international conventions that attempt to protect this cultural heritage. This book comprehensively and critically considers these five UNESCO cultural heritage conventions. The book looks at the conventions in the context of recent events that have exposed the dangers faced by cultural heritage, including the destruction of cultural heritage sites in Iraq and the looting of the Baghdad museum, the destruction the Buddhas of Bamiyan in Afghanistan, the salvage of artefacts from the RMS Titanic and the illicit excavation and trade in Chinese, Peruvian and Italian archaeological objects. As the only existing work to consider all five of the cultural heritage conventions adopted by UNESCO, the book acts as an introduction to this growing area of international law.

However, the book does not merely describe the conventional principles and rules, but, critically evaluates the extent to which these international law principles and rules provide an effective and coherent international law framework for the protection of cultural heritage. It is suitable not only for those schooled in the law, but also for those who work with cultural heritage in all its manifestations seeking a broad but critical consideration of this important area of international law.

This book has been developed in association with the Cultural Heritage Department of the Council of Europe. It examines key themes and objectives for the protection of the architectural and archaeological heritage in a range of European countries. The analysis of individual countries and the group as a whole gives an assessment of how advanced current mechanisms are and the ongoing problems that remain to be managed in order to safeguard the 'common heritage'.

This volume offers a critical inquiry into the ever-evolving notion of cultural heritage and the way it has been made accessible, governed, and protected by the institutional, operational, and legal structures of the European Union.

This Handbook provides a cutting edge study of the fast developing field of international law on the protection of cultural heritage by taking stock of the recent developments and of the core concepts and current challenges. The legal protection of cultural heritage has come under renewed focus from the international community and states since the 1990s. This is evidenced by the adoption of a range of international instruments. Countries are also enacting cultural heritage legislation or overhauling existing laws within their own national territory. Contributions address the protection of

immovable and movable, tangible and intangible cultural heritage in peacetime and in the event of armed conflict as well as the interaction between specific regimes of cultural heritage protection with other fields of international law, including international criminal law, human rights and humanitarian law, environmental law, international trade, investments, and intellectual property. The last part of the Handbook covers diverse regional systems of heritage protection.

This text sets the standard for researchers working on the difficult issues raised by trade and commerce in indigenous cultural heritage.
