The Indian Listener (fortnightly programme journal of AIR in English) published by The Indian State Broadcasting Service, Bombay, started on 22 December, 1935 and was the successor to the Indian Radio Times in English, which was published beginning in July 16 of 1927. From 22 August, 1937 onwards, it was published by All India Radio, New Delhi. In 1950, it was turned into a weekly journal. Later, The Indian listener became "Akashvani" in January 5, 1958. It was made a fortnightly again on July 1, 1983. It used to serve the listener as a Bradshaw of broadcasting, and give listener the useful information in an interesting manner about programmes, who writes them, take part in them and produce them along with photographs of performing artists. It also contains the information of major changes in the policy and service of the organisation. NAME OF THE JOURNAL: The Indian Listener LANGUAGE OF THE

This book is written by the famous saint Hazrat Sakhi Sultan Bahoo. Sultan ul Faqr Publications present its English translation version. Qurb e Deedar English Book with Persian Text by Sultan ul Arifeen Hazrat Sakhi Sultan Bahoo describes and explains the ways to achieve closeness to Allah and the Holy Prophet

Bioactive compounds play a central role in high-value product development in the chemical industry. Bioactive compounds have been identified from diverse sources and their therapeutic benefits, nutritional value and protective effects in human and animal healthcare have underpinned their application as pharmaceuticals and functional food ingredients. The orderly study of biologically active products and the exploration of potential biological activities of these secondary metabolites, including their clinical applications, standardization, quality control, mode of action and potential biomolecular interactions, has emerged as one of the most exciting developments in modern natural medicine. *Biotechnology of Bioactive Compounds* describes the current stage of knowledge on the production of bioactive compounds from microbial, algal and vegetable sources. In addition, the molecular approach for screening bioactive compounds is also discussed, as well as examples of applications of these compounds on human health. The first half of the book comprises information on diverse sources of bioactive compounds, ranging from microorganisms and algae to plants and dietary foods. The second half of the book reviews synthetic approaches, as well as selected bioactivities and biotechnological and biomedical potential. The bioactive compounds profiled include compounds such as C-phycoyanins, glycosides, phytosterols and natural steroids. An overview of the usage of bioactive compounds as antioxidants and anti-inflammatory agents, anti-allergic compounds and in stem cell research is also presented, along with an overview of the medicinal applications of plant-derived compounds. *Biotechnology of Bioactive Compounds* will be an informative text for undergraduate and graduate students of bio-medicinal chemistry who are keen to explore the potential of bioactive natural products. It also provides useful information for scientists working in various research fields where natural products have a primary role.

Sufism is a religion which emphasizes direct knowledge of the divine within each person, and meditation, music, song, and dance are seen as crucial spiritual strides toward attaining unity with God. Sufi paths of mysticism and devotion, motivated by Islamic ideals, are still chosen by men and women in countries from Morocco to China, and there are nearly one hundred orders around the world, eighty of which are present and thriving in the United States. The Chishti Sufi order has been the most widespread and popular of all Sufi traditions since the twelfth-century. *Sufi Martyrs of Love* offers a critical perspective on Western attitudes towards Islam and Sufism, clarifying its contemporary importance, both in the West and in traditional Sufi homelands. Finally, it provides access to the voices of Sufi authorities, through the translation of texts being offered in English for the first time.

"Gabriel Said Reynolds tells the story of Islam in this brief illustrated survey, beginning with

Muhammad's early life and rise to power, then tracing the origins and development of the Quran juxtaposed with biblical literature, and concluding with an overview of modern and fundamentalist narratives of the origin of Islam. Reynolds offers a fascinating look at the structure and meaning of the Qur'an, revealing the ways in which biblical language is used to advance the Qur'an's religious meaning. Reynolds' analysis identifies the motives that shaped each narrative Islamic, Jewish, and Christian. The book's conclusion yields a rich understanding of diverse interpretations of Islam's emergence, suggesting that its emergence is itself ever-developing" -- Publisher description.

The first comprehensive analytical treatment of warlordism in twentieth-century China, this book approaches regional militarism as a generic phenomenon of Chinese politics in the most complex and chaotic era of recent Chinese history. After describing the emergence of militarist regimes after the death of Yuan Shih-k'ai in 1916, the author analyzes their membership, goals, capabilities, and sources of cohesion, in the process presenting new information on their organization, methods of recruitment, quality of training, types of weapons, tactical and strategic concepts, and means of financing. On the strength of this information, he offers a convincing explanation in balance-of-power terms for the baffling advances, retreats, clashes, and changes of allegiance that have puzzled students of the era. His analysis makes clear how the leading warlords viewed the state, themselves, and each other. A concluding chapter presents an explanation based on systems theory for the Kuomintang's triumph over the warlords who had sought to confine its domain to Kwangtung. Included as appendixes are a chronology of events and lists of national leaders and provincial military authorities from 1916 to 1928.
