In this lively ethnography, Weiss studies the pansexual BDSM community in the San Francisco Bay Area. Weiss finds that BDSM practice is not as transgressive as the participants imagine, nor is it simply reinforcing of older forms of social domination. Instead she shows how

fantasy play depends on pre-existing social hierarchies, even as it also participates in a commodification of desires.

Techniques of Pleasure is a vivid portrayal of the San Francisco Bay Area's pansexual BDSM (SM) community. Margot Weiss conducted ethnographic research at dungeon play parties and at workshops on bondage, role play, and flogging, and she interviewed more than sixty SM practitioners. She describes a scene devoted to a form of erotic play organized around technique, rules and regulations, consumerism, and self-mastery. Challenging the notion that SM is inherently transgressive, Weiss links the development of commodity-oriented sexual communities and the expanding market for sex toys to the eroticization of gendered, racialized, and national inequalities. She analyzes the politics of BDSM's spectacular performances, including those that dramatize heterosexual male dominance, slave auctions, and US imperialism, and contends that the SM scene is not a "safe space" separate from real-world inequality. It depends, like all sexual desire, on social hierarchies. Based on this analysis, Weiss theorizes late-capitalist sexuality as a circuit—one connecting the promise of new emancipatory pleasures to the reproduction of raced and gendered social norms.

BDSM sexuality as a powerful tool for self-transformation and the realization of magical and spiritual aims • Details how to combine the 6 major types of S&M stimulation with sexual stimulation for magical and transformative purposes • Explores sado-magical workings from both submissive and dominant perspectives • Traces the roots of the BDSM tradition from ancient pagan and shamanic rituals to historical figures such as the Marquis de Sade, Aleister Crowley, and Anton LaVey Sex magic allows us to tap in to the most abundant power source available: sexual energy. Magicians, shamans, and fakirs throughout history have used physical stimulation and ritual to harness sexual energy, unlock inner states of consciousness, and activate the ability to influence their surroundings. While pleasure is often the focus of this stimulation, pain is just as effective, if not more so. Combining both pleasure and pain, the sadomasochistic practice of Carnal Alchemy offers a powerful tool for self-transformation and the realization of magical and spiritual aims. Authors Stephen and Crystal Dawn Flowers explain the sado-magical workings of Carnal Alchemy from both the perspective of the submissive partner as well as the dominant. They detail the 6 major techniques of sadomasochistic stimulation--bondage,

flagellation, piercing, penetration, clamping, and heat/cold--and how they can be combined with sexual stimulation for magical purposes. They trace the roots of the BDSM tradition in ancient pagan rites of passage, in indigenous shamanic rituals, and through historical figures who used this form of sexuality in their magic and philosophy, from the Marquis de Sade to more modern exemplars such as Aleister Crowley, Ernst Schertel, and Anton LaVey. This guide also covers specialized furniture and tools and the decor of "the Chamber" to trigger states of consciousness in which the Sado-Magician can effectively express his or her will.

There are tremendous benefits to discussing the subject of sexual and emotional pleasure with clients, and this book addresses the challenges and misconceptions of doing just that. Laura Rademacher and Lindsey Hoskins teach the skills necessary for mental health professionals and sex educators to build competence in this work with their clients. Readers get techniques to implement in therapeutic, clinical, and educational settings, and learn how to examine pleasure in ways that are currently lacking from academic work on sexual health. This book covers skills for working with populations of all orientations and gender expressions. Language and phrasing for addressing pleasure issues in a wide variety of educational or therapeutic settings is also provided. Information about sexual lubrication and sex toys that is rarely taught in professional training programs is included, as well as how to appropriately incorporate information about these important sexual tools into your work. Issues such as abstinence, sexual orientation, couple therapy, and sexual education will be discussed outside of the standard medical model of sex therapy. The Principles of Pleasure will help you feel relaxed and confident while moving clients and students closer to their pleasure goals, and provides the evidence to back up the importance of talking and teaching about pleasure, should you need to justify this work.

Michel Foucault offers an iconoclastic exploration of why we feel compelled to continually analyze and discuss sex, and of the social and mental mechanisms of power that cause us to direct the questions of what we are to what our sexuality is.

This dissertation explores the socioeconomic context and politics of the semipublic, pansexual SM (consensual kink, BDSM, S&M) community in the San Francisco Bay Area. The research is based on 18 months of ethnographic fieldwork (2000-2003) and semi-structured interviews with 61 diverse participants. The author seeks to situate this community in relation to (1) late-modern configurations of capitalism and (2) the performative politics of SM play.
